Technical Data

Properties	Application areas
<ul style="list-style-type: none"> ✓ Polyurethane adhesives provide extremely strong bonding. Even before the adhesive dries and seals completely, the initial bond is strong enough that clamps and other types of securing instruments are unnecessary. This makes manufacturing and construction processes both simpler and cheaper ✓ Polyurethane adhesives tend to be very flexible and durable, and they provide good impact resistance ✓ They vary in degree of resistance to heat and chemicals, as well as in the level of their bulk flexibility 	<ul style="list-style-type: none"> ✓ For structural or cosmetic repair of plastic-bumpers, fenders, spoilers, lamp-housings, radiators etc. in the automotive- and other industries where quick cure time on almost any type of plastic material is needed. Also bonds to wood, metal, plastic, fiberglass, ceramic and substrates.
