

## Static mixers – MIXPAC™ MFH / MFHX mixers

### Technical Data

The STATOMIX™ MFH and MFHX mixers were developed for the MIXPAC® F200ml and MIXPAC® F400ml cartridge systems. The F system mixers feature a unique, state-of-the-art interface design between the static mixer and the cartridge. This interface features separated outlets which eliminates the possibility of cross contamination and curing at the mixer tip.

An enhanced design of the static mixer allows for the mixing and dispensing of higher viscosity adhesives. Higher dispensing pressures also allow for use of smaller mixers, promoting less waste
